

Patient Assurance Program (PAP)

The PAP program ensures that members living with chronic conditions never pay more than \$25 for up to a 30-day supply of participating preferred medications.

Members can save more than 25% at the pharmacy counter.

- Better member experience.
- Increased visibility to member pay, no more "price-shopping."
- 38% or less abandonment (with copay of less than \$40)
- Additional client value provided to reduce plan cost implications.
- Drives significant reduction in total medical cost (15.9-16.3% change).
- Utilization increases 10% when compared to non-PAP CDH clients.
